ELECTION/RESTRICTIONS

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 3-23 drawn to a structured fluid composition, classified in class 430, subclass 32.
- II. Claim 2 drawn to an electronically addressable display, classified in class 359, subclass 296.

Inventions I and II are related as product (*e.g. an electrophoretic composition*) and process of use (*e.g. in a TIR-mode electrophoretic display*). The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product could be used in a wide range of devices and in different modes of operation; including conventional-mode reflective electrophoretic display panels, and/or TIR-mode optical switching elements. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). A telephone call was made to Teresan W. Gilbert on 3/17/2005 in order to request an oral election to the above restriction requirement, but did not result in an election being made.
